Sharing Your Notebook on Google Colab: Step-by-Step Guide

To share this Jupyter Notebook (`experiments/smart_grid_digital_twin.ipynb`) with your advisor via Google Colab, choose one of the two methods below.

—

Method 1: The Google Drive Path (Easiest)

- **Upload the Notebook to Google Drive:**
- Go to [Google Drive](https://drive.google.com).
- Click **New** -¿ **File upload**.
- Select `experiments/smart_grid_digital_twin.ipynb` from your workspace folder (`c:Grid`).
- **Open with Colab:**
- Double-click the uploaded `.ipynb` file in Google Drive.
- If it doesn't open in Colab automatically, click **Open with** at the top and select **Google Colaboratory**.

(If Colab is not connected, click "Connect more apps", search for Colaboratory, and install it).

- **Get the Shareable Link:**
- Once open in Colab, click the **Share** button in the top-right corner.
- Under **General access**, change it from **Restricted** to **Anyone with the link**.
- Change the permission level from **Viewer** to **Commenter** or **Editor** (if you want your advisor to be able to add comments or run the code themselves).
- Click **Copy link** and send it to your advisor!

—

Method 2: The GitHub Path (Direct Public Colab Link)

Our repository hosts the notebook publicly on GitHub. You can share this direct link with your advisor:

[Open Notebook in Google Colab](https://colab.research.google.com/github/himanshu-2l/Graph-Digital-Twin-XAI-/blob/main/experiments/smart_grid_digital_twin.ipynb)
